DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 and 25-34, 37 drawn to a method of, apparatus for, and computer program product for using an addressable array of biopolymers on a substrate, classified in class 435, subclass 6.
- II. Claims 17-24, 35-36, and 38-42 drawn to a method of and apparatus for retrieving a stored image, classified in class 711, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Group I and Group II contain different critical features. Group I is a method for using an addressable array which comprises detecting signals, establishing a shape, processing a set, and saving a displayed shape. This is distinct from the method of Group II, which comprises retrieving a saved shape from memory. The method steps of Group I and Group II are vastly different and are classified in different classes and subclasses. These encompass two separate search areas and subject matter.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1631

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.148(b) and by the fee required under 37 CFR 1.17(h).
